

River Tower

202 ModuSat Heating & Cooling Interface Units

Project Overview

The River Tower development is one of two newly developed towers for the Nine Elms district in Vauxhall. The 42-storey tower is neighbouring another, slightly larger residential tower- City Tower. Evinox are delighted to be delivering a heat network solution to both of these developments.

Our Solution

Evinox are providing 101 heat interface units and 101 cooling interface units to provide heating, domestic hot water and cooling to the residents of River Tower. Indirect heating and instantaneous domestic hot water will be supplied via our ModuSat® XR-ECO twin plate heat interface units, whilst cooling will be provided via our ModuSat® single plate cooling Interface units.

Equipment Overview

- ✓ ModuSat® XR-ECO Twin Plate Heat Interface Unit
- ✓ ModuSat® Single Plate Cooling Unit
- ✓ Flushing Bypass and Valve Kit
- ✓ External Filling Loop
